Project 1 – Group 5

- Bryen
- Miyako
- Luis
- Jared
- Blaine

It all Started in Minneapolis

The land of 10,000 lakes

The idea of having an application that splits group cost amongst friends that have spent a night out on the town and looking into splitting their entertainment bill

Group Cost Calculator

- Tool design to help groups split shared expenses equally
- Tool allows you to add names and expenses
- Calculates the final cost
- Ensures everyone pays an equal share of the total cost

Concept

- The concept of this Group cost calculator to be able to simply add the cost of any group total and amongst one another
- Interface is easy to use
- Motivation for develop to ment?
- User story

Process

- Cost Calculator
- Breakdown of tasks and roles
- Challenges
- Successes

Cost calculator

Friends to enter their name and expense in the cost calculator app

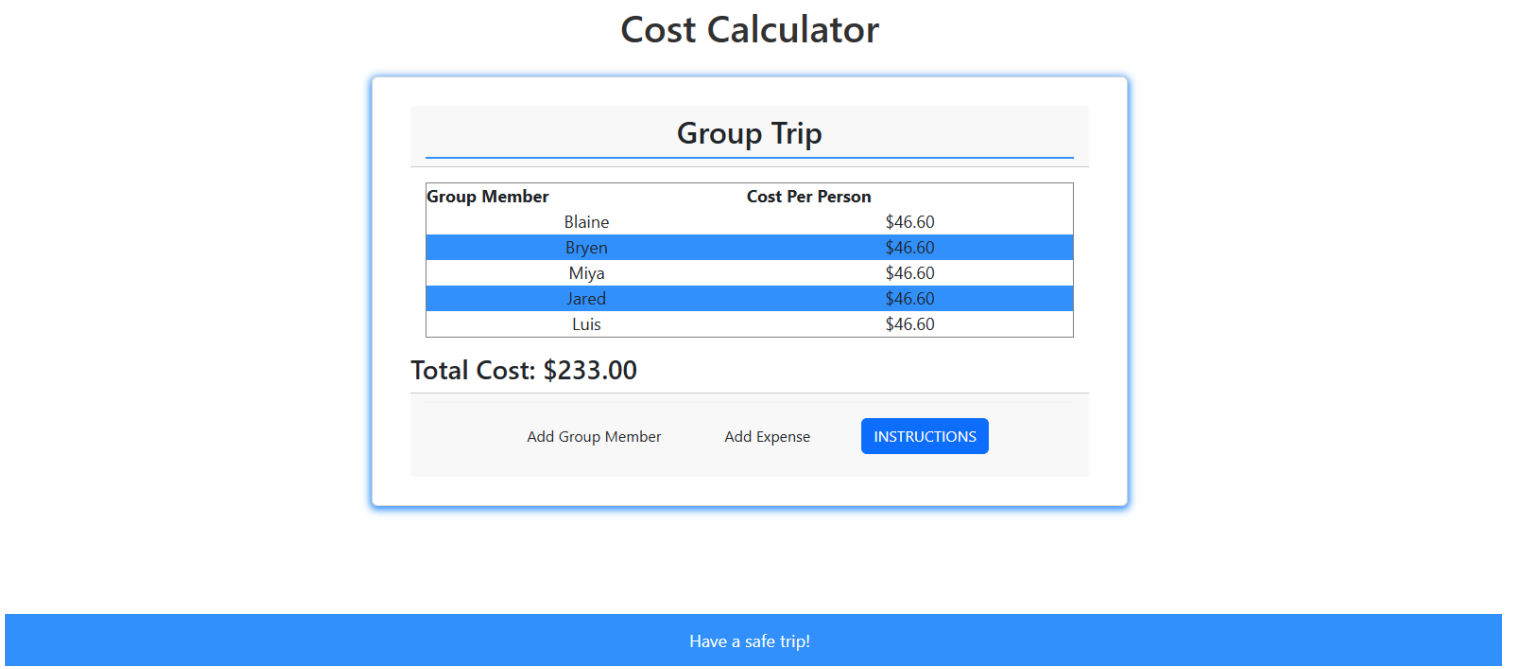

To have everyone in the friend's group bill be equally split

The application splits the total of the group bill including taxes

Demo

- Demonstrate live demo of the application

- Can switch screen share
